UNIVERSAL MULTI-PATH COMMUNICATORS

for Central Monitoring
and Smart Self-Monitoring

Mini01 Specifications

- GSM/GPRS Quad-band, GPRS class 12
- ARM9 processor, 512KB RAM, 1.5MB Flash
- Dial Capture interface supporting Ademco ContactID
- Serial interface for integration with compatible alarm panels
- Up to 3 digital inputs
- Up to 2 digital outputs
- Build-in SIM chip
- Ultra-Compact Dimensions: 30x45x15mm
- Conforms to EN 50136 / Grade 4

MQ03 Specifications

- GSM/GPRS Quad-band, GPRS class 12
- ARM9 processor, 512KB RAM, 1.5MB Flash
- LAN Ethernet 10/100 (optional)
- Dial Capture interface (Ademco ContactID)
- Up to 8 digital inputs
- Up to 4 digital outputs
- Up to 3 serial ports - UART, RS232, RS485
- Dual SIM card (optional)
- Dimensions: 63x90x32
- Conforms to EN 50136 / Grade 4

Expansion modules:

- 433 MHz radio transceiver
- RFID 125KHZ or 13.56MHz NFC/MiFare Card Reader
- IP Camera

Multi-Path alarm signalling:

- **Multiple transmission channels** – LAN/GPRS/SMS/GSM/PSTN
- **Redundant servers** – providing transparent failover
- **Connection monitoring** – adjustable polling intervals
- **Remote management**– online diagnostics and firmware updates
- **Seamless integration with ARCs** – supports various communication protocols (SurGard MLR2 and System III, ANSI/SIA DC09, etc.)
- **Support of any intruder alarm system** – through digital outputs (PGMs), serial port, or Dial capture interface
- **Remote upload/download** – transparent remote programming of the alarm panel with the panel manufacturer's software
- **Fits anywhere** – with the MiNi device you can find a place even in the narrowest alarm panel enclosures

Visual verification of alarm events:

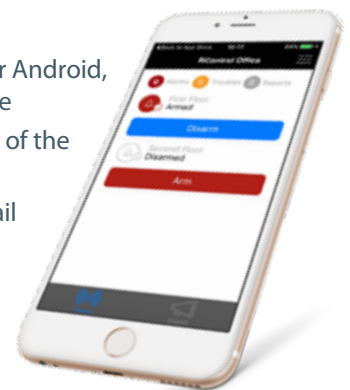

- **Integration with new and existing IP cameras** - even when there is no internet or broadband at the property.
- **Receive images of alarm events** on your smartphone
- **Make snapshots on demand** - keep an eye on what's going on at your property

World SIM cards:

- **National roaming for increased reliability** – utilizes multiple network operators per country
- **Flat-rate billing** – improved profitability and cost control
- **Worldwide coverage** in more than 100 countries

Turn ANY intruder alarm into a SMART security system

- Smartphone application for Android, iPhone and Windows Phone
- Remote Arming/Disarming of the alarm system
- Real-time push, text or email notifications
- Events log back in time
